

Topdress Plus

Topdress plus Wetting Agent

- Powerful, fast acting fertilisers
- For use on trees, shrubs and turf
- Contains SaturAid Wetting Agent
- Trace elements for fast greening and rejuvenation

TopdressPlus from AGS is a fast and effective combination of fertilisers and wetting agent, developed to rapidly improve the health and vitality of trees, plants and turf. As nutritional products and wetting agents that are incorporated into potting media generally have a shelf life of twelve months or less, any plant stock remaining in the nursery after this time should be topdressed to avoid decline in quality and to continue healthy growth.

Many topdress products on the market today only offer nutrition, and do not have the added benefit of a wetting agent. Whether it's used on lawns, gardens or incorporated into potting mix, SaturAid Wetting Agent will improve growth rates as well as encouraging a more vibrant root system. Lasting up to nine months, SaturAid is one of the longest lasting wetting agents on the market today.

TopdressPlus also contains trace elements for general plant health, and is a good source of Iron and Calcium. So if you need to topdress your stock, make sure you do it with TopdressPlus from AGS.

Available in 15kg buckets and in bulk.

Analysis	
NPK	9-1-13 (3 Fe)
Nutritional Breakdown	
Nitrogen as Urea	4.9%
Nitrogen as Potassium Nitrate	4.4%
Total Nitrogen	9.3%
Total Phosphorus as Superphosphate	1.0%
Total Potassium as Potassium Nitrate	12.7%
Total Sulphur as Sulphate	0.6%
Calcium as Superphosphate	0.5%
Calcium as Phosphate	0.1%
Calcium as Sulphate	0.2%
Total Calcium	0.8%
Iron as EDTA Soluble	0.4%
Total Iron	2.7%
